Advantech Wireless Wins Again in LATAM

Advantech Wireless VSAT Products Beat Competition Again in Latin America. After successfully fulfilling a recent order for \$2.4M, Advantech Wireless was awarded with a new additional contract for \$3 million. Both contracts add up to more than 3500 VSAT earth station equipment for a Telephone Company in Latin America that is undergoing significant network expansions to support multiple services including enterprise, COTM, mobile backhaul, and NGN nodes.

New Expanded A-Line Series Antenna System

In order to meet customer demand, Advantech Wireless has expanded its A-Line Series of Fixed Antennas.

Designed with the latest in CAD technology to meet the newly updated INTELSAT (IESS) standard, the A-Line Series Antenna System is characterized by high gain, low sidelobes and low cross polarization.

Advantech Wireless offers a complete line of Mobile Antennas, Quick Deploy Fly-Away Antennas and largest Broadcast Antennas at the best possible price.

GaN-based HPA Product Line Survey.

Advantech Wireless has developed a full line of Solid State Power Amplifiers (SSPAs), covering L-band to Ku-band as a result of several years of R&D in partnership with key technology suppliers.

At Satellite 2010, Advantech Wireless initially launched the first World Wide GaN based Ku-band product offering.

We now have GaN based products covering many bands and power needs, with major large scale deployments both in commercial and in military markets.

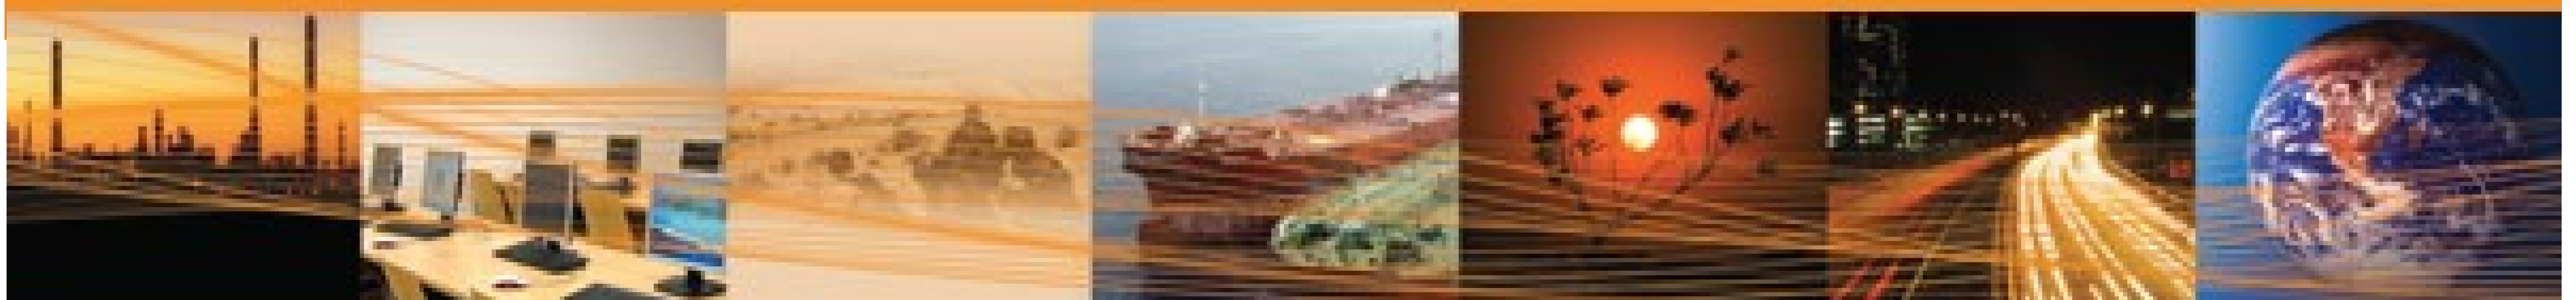

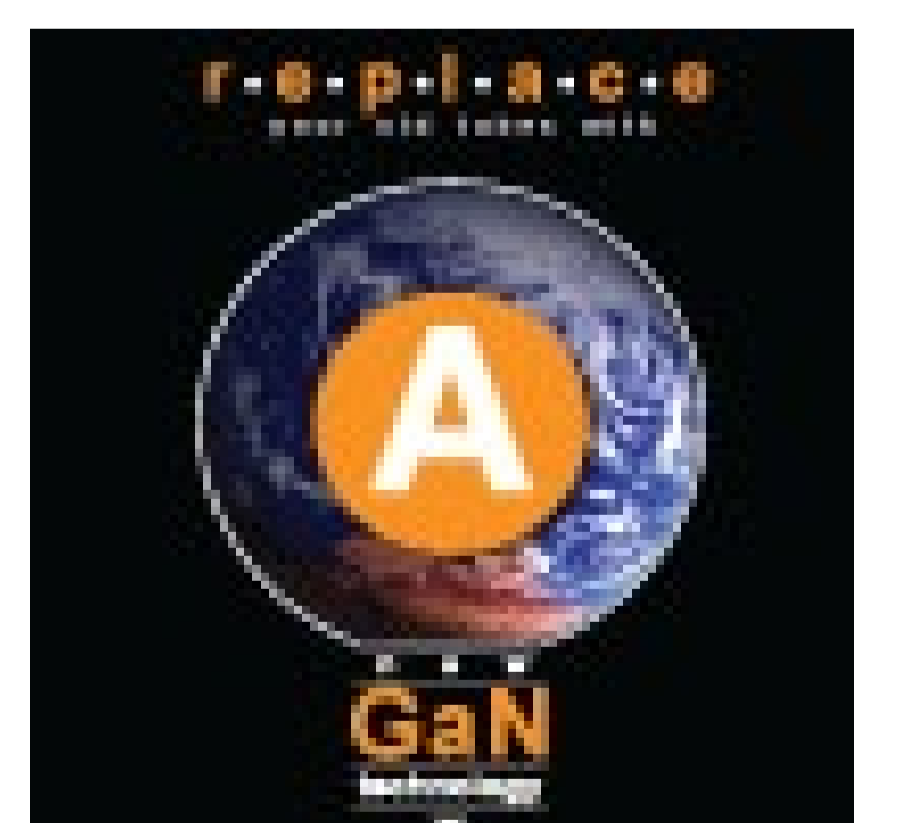

As part of our continual improvement initiative, please help us by completing our [HPA Product Line Survey](#) or [click here](#) to learn more about our GaN product line.

Advantech Wireless \$1000 Promotion.

Advantech Wireless continues to make it easier to get into the new technology wagon. This special replacement promotion credits you up to \$1,000 for your old TWTA towards the purchase of a replacement SSPA or BUC from us by September 30, 2012.
